THE VI AMMCS INTERNATIONAL CONFERENCE

Waterloo, Ontario, Canada | August 14-18, 2023

We look forward to welcoming you in 2023 to the next exciting event in the Interdisciplinary AMMCS Conference Series.

The AMMCS Conference Series aims at promoting interdisciplinary research and collaboration involving mathematical and computational sciences, highlighting recent advances in Applied Mathematics, Modelling and Computational Science (AMMCS).

It is a major international forum for the exchange of ideas in an interdisciplinary setting with a focus on mathematical and computational sciences, as well as their applications in natural and social sciences, engineering and technology, industry, and finance. Among the main themes of the 2023 edition of the conference will be the focus on the ubiquitous nature of coupled systems and multiscale dynamics, their modeling, and their applications. One of the previous events in this series, the AMMCS-CAIMS Congress, was combining the AMMCS and CAIMS meetings at the same location. The 2023 meeting will follow the traditions of highly successful previous biennial meetings in this series.
